# ABDULLAH EID RAWAK

Data Analyst • Business Intelligence Specialist • Applied Data Scientist

Riyadh, Saudi Arabia • +966 510524527 • roawaq@gmail.com

Whatsapp • Portfolio • LinkedIn • GitHub • Kaggle

*Iqama: Transferable | Languages: Arabic (Native) • English (Professional)*

## PROFESSIONAL SUMMARY

Results-driven Data Analyst with 4+ years of experience turning raw data into decisions that move the needle — across Real Estate, Retail, F&B, Supply Chain, and Consulting sectors in Saudi Arabia and Egypt.

Core expertise spans end-to-end analytics: from engineering data pipelines and warehouses to building executive dashboards in Power BI, Microsoft Fabric, and Tableau that cut reporting cycles and surface the insights that matter. Equally comfortable writing production-grade Python, SQL, and presenting findings to C-suite stakeholders.

Delivered measurable impact: reduced reporting time by 45%, improved resource allocation efficiency by 66%, grew sales performance by 25%, and boosted customer retention by 16% — using machine learning, predictive modelling, and targeted segmentation.

## PROFESSIONAL EXPERIENCE

### Data Analyst • Alramz Real Estate

*Riyadh, KSA • Nov 2025 – Present*

- Built an end-to-end Broker Performance Framework **classifying 1000+ brokers across 6 performance tiers** using a multi-dimensional model driven by activity rates, quality scores, and reservation conversion data — reducing manual classification effort by **~70%**.
- Engineered a daily operational Power BI & Microsoft Fabric dashboard with dynamic alert logic, dormancy detection, week-on-week CBS drop analysis, and BPM portfolio filtering — **cutting management reporting time from 3 days to under 4 hours**.

### Data Analyst Consultant • Tanmiah

*Riyadh, KSA • Oct 2024 – Nov 2025*

- Architected a central data warehouse integrating 12+ datasets from public agencies and NGOs, enforcing data quality and governance standards — **reducing reporting time by 40%** and making data accessible to 5 policy teams simultaneously.
- Developed end-to-end ETL pipelines and built real-time Power BI dashboards for senior stakeholders — directly driving **62% improvement in resource allocation efficiency** for community programmers serving 200,000+ beneficiaries.

### Data Analyst • Namar

*Riyadh, KSA • Aug 2023 – Sep 2024*

- Developed a demand-forecasting machine learning model achieving **90% precision**, driving a **25% uplift in sales performance** and enabling more accurate inventory planning across three product lines.
- Boosted customer retention by **16%** through customer segmentation analysis and satisfaction scoring, informing four targeted marketing campaigns with measurably higher conversion rates.

### Performance Analyst (R&D) • NSPO

*Cairo, Egypt • Nov 2022 – Dec 2023*

- Led budget performance analysis achieving **78% accuracy in planning** across a portfolio of 15+ government projects — up from a 61% baseline.
- Streamlined variance analysis workflows, **reducing issue identification time by 30%** and enabling faster corrective action for budget overruns.
- Optimised a predictive budget-forecasting model that **cut forecasting errors by 14%**, improving planning reliability for quarterly and annual cycles.

## EDUCATION

**BSc in Computer Science** • **Beni Suef University (BSU), Egypt**
*Sep 2019 – Jul 2022*

- Graduated with Distinction — 98% score in Graduation Project (Construction Works Application).

**Professional Diploma in Data Science (CDSP)** • **EPSILON AI Institute**
*Mar 2021 – Dec 2021*

- Coursework: Data Science Lifecycle, Data Wrangling & Cleaning, ML, EDA, Hypothesis Testing, Probability & Inferential Statistics.

## TECHNICAL SKILLS

**Programming & Libraries:** Python (Pandas, NumPy, Scikit-learn, SciPy, Matplotlib, Seaborn), R, SQL, DAX, SAS, Java

**BI & Visualisation:** Power BI, Microsoft Fabric (Lakehouse, Dataflows Gen2, Notebooks, Pipelines), Tableau, Looker Studio, SAP Cloud Analytics, MS Excel

**Machine Learning & AI:** TensorFlow, Keras, PyTorch, Spark, AWS SageMaker, IBM Watson, Vertex AI

**Data Engineering:** SSIS, BigQuery, Azure Data Factory, Synapse Analytics, Apache Spark, dbt, ETL/ELT pipelines

**Cloud Platforms:** Microsoft Azure, AWS (Redshift, EC2), Google Cloud Platform (GCP), Jupyter, Flask, Git

**A/B Testing:** Google Optimize, Optimizely

**Governance & Compliance:** Data governance frameworks, PDPL, NCA compliance, ZATCA compliance analytics, VAT reporting, Vision 2030 digital transformation

## CERTIFICATIONS

### AI & Generative AI

- AI Applications in Marketing and Finance — University of Pennsylvania (Jan 2024)
- LLMops — DeepLearning.AI (Jan 2024)
- Generative AI — Google Cloud (Dec 2023)
- Generative AI at SAP — SAP (Nov 2023)
- Artificial Intelligence Fundamental — FutureLearn (Aug 2021)

### Machine Learning & Data Science

- Applied Machine Learning in Python — University of Michigan
- Machine Learning Operations (MLOps) — Coursera (Aug 2023)
- Machine Learning for Data Science Projects — IBM (Nov 2023)
- Planning a Machine Learning Project — AWS (Nov 2023)
- Data Science Capstone: Real World ML Decisions — AWS (Feb 2022)
- ML Essentials for Business and Technical Decision Makers — AWS (Jul 2022)
- ML for Business Challenges — AWS (Feb 2021)
- ML for Business & Technical Decision Makers — AWS (Dec 2022)
- Intermediate Machine Learning — Kaggle (Feb 2022)
- Data Science — IBM (Apr 2022)

### Microsoft

- Data Analysis with Power BI — Microsoft (Feb 2021)
- Implementing Azure Infrastructure Solutions — Microsoft (Sep 2021)
- Principal of Sustainable Software Engineering — Microsoft (Jan 2022)
- Perform Cloud Data Science with Azure Machine Learning — Microsoft (Apr 2022)
- Explore and Analyze Data Using Python — Microsoft (Feb 2023)

### IBM

- IBM Watson Studio — IBM (Nov 2022)
- Deploy Apps Using DevOps — IBM (Apr 2021)

### Business & Other

- Business Model Innovation — Egypt Innovate (Apr 2023)
- Database Fundamental — Information Technology Institute (ITI) (Mar 2021)
- Data Curation for SAS Data Scientists — SAS (Sep 2022)
- Learning Python — LinkedIn Learning (Mar 2022)
